

# GAMES THAT MOVE YOU

therapy in motion

**Remote Therapeutic Monitoring is the way of the future.**

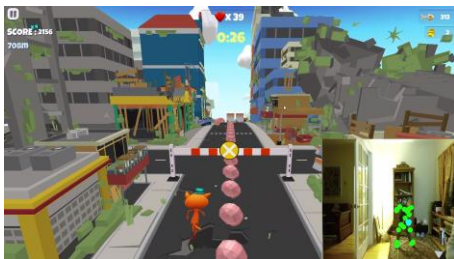

**We can help your clinic bridge the gap and utilize the new remote therapy CPT codes.**

---

- ▶ Our gamified approach to therapy more fully engages patients resulting in higher compliance with at-home exercise protocols and optimal duration of the exercise sessions.
  - ▶ Our technology incorporates artificial intelligence that automatically adjusts the difficulty of the game based on the kinematics of movements by the patient.
- 

- ▶ Our solutions keep your therapists at the forefront of your patient's care, allowing both clinicians and patients to maximize their time, enhance patient outcomes and achieve rapid recovery.
- ▶ Our comprehensive reporting provides feedback on the frequency and duration of home sessions and captures the metrics associated with the targeted movements enabling therapists to refine treatment plans to recognize successes and address challenges.

### **Patients say it best:**

*"It definitely did not feel like physical therapy, it was too much fun. You know, physical therapy isn't usually fun."*

*"Big return for the effort expended. Very much improved use of my hand and arm"*
